INTRODUCTION

(i) This report presents the growth trends for the telecom services in India for the quarter ending **December 2008.** This report provides a broad perspective on the Telecom Services to serve as a reference document for various stakeholders, research agencies and analysts. Under the Unified Access Service (UAS) Regime, the details of subscriber base under wireless services, both GSM & CDMA (WLL(F) + WLL(M)) technologies has been combined. The Executive Summary of various Telecom Services has been given in the beginning followed by 'Performance Indicators at a Glance'. First four chapters deliberate the growth pattern of Wireline, Wireless, Internet and Value Added Services (VAS). Chapter Five includes QoS performance analysis of various service providers. Chapter Six is on performance of Cable TV, DTH & Radio Broadcast services. Financial details of telecom services sector is given in Chapter Seven.

(ii) The report has been compiled on the basis of information received from various telecom service providers. TRAI collects performance-based data from various service providers on quarterly basis to monitor the growth trends in the telecom sector.

(iii) This performance indicator report is also available on TRAI's website (http://www.trai.gov.in/Reports_list_year.asp). Any suggestion pertaining to this may please be addressed to S. K. The average outgo per outgoing minute (Rental revenue + Airtime revenue per outgoing minute), therefore, is a realistic indicator of tariff levels. Annexure D indicates the average outgo per outgoing minute i.e. Rental revenue + Airtime revenue per outgoing minute.

2.19 All India average outgo per minute has shown a marginal decline from Rs. 0.79 in September 2008 to Rs. 0.78 in December 2008.
