India Monthly Report under the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021

Published on 2025-08-31

Meta

Scope

The following report is published in accordance with Rule 4(1)(d) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021.

The report contains information for a period of 31 days on (1) actions taken against violating content on Facebook and Instagram for content created by users in India and proactive detection rates, and (2) information on grievances received from users in India via the grievance mechanisms described below and (3) orders received from Grievance Appellate Committee (GAC). This report captures information for the period from 2025-07-01 to 2025-07-31.

We expect to publish subsequent editions of the report with a lag of 30-45 days after the reporting period to allow sufficient time for data collection and validation. We will continue to bring more transparency to our work and include more information about our efforts in future reports.

Facebook and Instagram policies

We want Facebook and Instagram to be places where people have a voice. To create conditions where everyone feels comfortable expressing themselves, we must also protect their safety, privacy, dignity and authenticity. This is why we have Meta's Community Standards [1] , which define what is and is not allowed in our community.

Proactive detection and actioning of violating content

The report describes our efforts to remove harmful content from Facebook and Instagram and demonstrate our continued commitment to making Facebook and Instagram safe and inclusive. In this report, we are sharing two metrics which quantify our efforts on removing content and being able to detect them proactively before a user reports them to us. These metrics are our best estimates for actions we take on content created by users who we predict are users in India.

1. Content Actioned: We measure the number of pieces of content (such as posts, photos, videos or comments) we take action on for going against our standards. This metric shows the scale of our enforcement activity. Taking action could include removing a piece of content from Facebook or Instagram or covering photos or videos that may be disturbing to some audiences with a warning.
2. Proactive Rate: This metric shows the percentage of all content or accounts acted on that we found and flagged before users reported them to us. We use this metric as an indicator of how effectively we detect violations. The rate at which we can proactively detect potentially violating content is high for some violations, meaning we find and flag most content before users do. This is especially true where we have been able to build machine learning technology that automatically identifies content that might violate our standards.

In this report, we have provided a breakdown of proactive detection and content actioned in 13 policy areas on Facebook and 12 policy areas on Instagram.

On November 12, 2024, Meta launched the unified Community Standards, bringing together what was previously our Community Standards for Facebook, and our Community Guidelines for Instagram and Threads, into one set of policies. The rules themselves did not change as a result of this unification. For further information, see here.

Table 1: Content Actioned and Proactive Rate on Facebook (2025-07-01 - 2025-07-31)

Policy Area	Content Actioned	Proactive Rate
1. Adult Nudity and Sexual Activity	1.3M	98.3%
2. Bullying and Harassment	24.0K	45.9%
3. Child Endangerment - Nudity and Physical Abuse	581.2K	99.8%
4. Child Endangerment - Sexual Exploitation	144.0K	99.2%
5. Dangerous Organizations and Individuals: Organized Hate	4.2K	95.4%
6. Dangerous Organizations and Individuals: Terrorism	27.5K	98.7%
7. Hate Speech	4.7K	47.9%
8. Regulated Goods: Drugs	10.2K	98.1%
9. Regulated Goods: Firearms	7.3K	97.9%
10. Suicide and Self-Injury	1.5M	99.8%
11. Spam	1.3M	98.0%
12. Violent and Graphic Content	586.3K	98.8%
13. Violence and Incitement	7.1K	75.4%

To understand more about each of these policy areas, visit Meta's Community Standards page.

Table 2: Content Actioned and Proactive Rate on Instagram (2025-07-01 - 2025-07-31)

Policy Area	Content Actioned	Proactive Rate
1. Adult Nudity and Sexual Activity	861.7K	95.7%

2. Bullying and Harassment	62.7K	55.2%
3. Child Endangerment - Nudity and Physical Abuse	231.6K	99.4%
4. Child Endangerment - Sexual Exploitation	153.1K	97.8%
5. Dangerous Organizations and Individuals: Organized Hate	4.9K	89.9%
6. Dangerous Organizations and Individuals: Terrorism	40.8K	98.0%
7. Hate Speech	11.4K	50.1%
8. Regulated Goods: Drugs	17.7K	97.4%
9. Regulated Goods: Firearms	5.8K	92.4%
10. Suicide and Self-Injury	3.0M	99.6%
11. Violent and Graphic Content	433.4K	97.8%
12. Violence and Incitement	12.4K	72.5%

To understand more about each of these policy areas, visit Meta's Community Standards page.

Note:

1. These metrics are our best estimates of content we act on and of proactive rates based on the creator of the content and predicted country locations for those users.
2. The metrics in this report are based on definitions and caveats as disclosed in Content Actioned and Proactive Rate.
3. Given that such violations are also highly adversarial, country-level data may be less reliable. For example, bad actors may often try to avoid detection by our systems by masking the country they are coming from. While our enforcement systems are global and will try to account for such behaviour, this makes it very difficult to attribute and report the accounts or content by producer country (where the person who posted content was located). Given the global nature of our platforms where content posted in one country may be viewed almost anywhere across the world, other ways to attribute the country of content removed in a technically feasible and repeatable manner, become almost meaningless. So these estimates should be understood as directional best estimates of the metrics.
4. The metric for ‘Spam’ on Instagram is not available yet. We are working on new methods to measure and report this metric.
5. This report shares metrics in which we have considerable confidence in their accuracy but is not a

comprehensive list of all enforcements across Facebook and Instagram. As we develop metrics for new policy areas, we will continue to expand this report, similar to our Community Standards Enforcement Report.

Grievances from users in India

This part of the report captures grievances from users in India received via -

- the contact form published in the Help Center regarding violations of Facebook's Terms of Service, Meta's Community Standards, or questions about accounts;
- the contact form published in the Help Center regarding violations of Instagram's Terms of Use, Meta's Community Standards, or questions about accounts; and
- the common physical mail address published in the Help Center for both Facebook and Instagram.

The above mechanisms are open to all users in India in the respective Help Center pages and are also searchable via the Help Center search bar.

In this report, we report on the following data associated with the grievances from users in India:

1. Total number of reports received, broken down by reasons why they were reported
2. Total number of reports that we responded to
3. Reports where we provided appropriate tools to resolve the issues
4. Reports where we took some action against the reported content -
    a. By actioned content, we mean removing the piece of content from Facebook or Instagram, covering photos or videos that may be disturbing to some audiences with a warning, or disabling accounts. When something on Facebook or Instagram is reported to us as violating local law, but doesn't go against our Community Standards, we may restrict the content's availability in the country where it is alleged to be illegal. This includes legal requests such as court orders.
5. Reports may have been reviewed but not actioned for several reasons, including -
    a. The reported content does not violate any of our policies.
    b. The reporter does not provide us enough information to locate the content or account which they are attempting to report.
    c. The reported account or content does not violate our policies.
    d. The reporter is writing to us to provide feedback regarding our services.
    e. The reporter is writing to us regarding a dispute between themselves and a third party which Facebook is not in a position to arbitrate.
    f. The reporter is writing to us regarding content which is not hosted on our platform.
    g. The reporter is writing to us regarding content which they wish to see removed, but only providing the link to an entire profile or page, and we are unable to determine which specific content they

are referring to.

h. The reporter is requiring assistance from us to access their account

Facebook

Between 2025-07-01 and 2025-07-31, we received 36,978 reports through the Indian grievance mechanism, and we responded to 100% of these 36,978 reports. The reports were received under the following categories.

Table 3: Reports received

Category	Number of reports
Fake profile that's pretending to be me	4,091
Content showing me in nudity/partial nudity or in a sexual act	2,964
Account has been hacked	86
Lost access to a page or group I used to manage	1,026
Bullying or Harassment	18,973
Request access to personal data	0
Inappropriate or Abusive Content	8,032
Report issue with how Facebook is processing my data	0
Content I appear in that I do not want displayed*	Not Available
Other issue	1,806
Total	36,978

Of these incoming reports, we provided tools for users to resolve their issues in 33,061 cases. These include pre-established channels to report content for specific violations, self-remediation flows where they can download their data, avenues to address account hacked issues etc.

*We are unable to generate the metric for this reporting period due to a technical issue which we are currently investigating.

Table 4: Reports where appropriate tools were provided

Category	Number of reports
Fake profile that's pretending to be me	3,513

Content showing me in nudity/partial nudity or in a sexual act	2,583
Account has been hacked	54
Lost access to a page or group I used to manage	1,011
Bullying or Harassment	17,075
Request access to personal data	0
Inappropriate or Abusive Content	7,090
Report issue with how Facebook is processing my data	0
Content I appear in that I do not want displayed*	Not Available
Other issue	1,735
Total	**33, 061**

We took action on 3,917 reports in total. The remaining 33,061 reports were reviewed, and we provided appropriate tools to users to resolve their issues.

*We are unable to generate the metric for this reporting period due to a technical issue which we are currently investigating.

Instagram

Between 2025-07-01 and 2025-07-31, we received 22,952 reports through the Indian grievance mechanism, and we responded to 100% of the 22,952 reports. The reports were received under the following categories

Table 5: Reports received

Category	**Number of reports**
Content showing me in nudity/partial nudity or in a sexual act	847
Fake profile that's pretending to be me	6,452
Account has been hacked	1,869
Lost access to a page or group I used to manage	1,316
Content I appear in, that I do not want displayed*	Not Available

Request access to personal data	0
Bullying or Harassment	2,759
Inappropriate or Abusive Content	1,834
Other issue	7,875
Total	**22,952**

Of these incoming reports, we provided tools for users to resolve their issues in **18,463** cases. These include pre-established channels to report content for specific violations, self-remediation flows where they can download their data, avenues to address account hacked issues etc.

*We are unable to generate the metric for this reporting period due to a technical issue which we are currently investigating.

Table 6: Reports where appropriate tools were provided

Category	**Number of reports**
Fake profile that's pretending to be me	4,847
Content showing me in nudity/partial nudity or in a sexual act	676
Account has been hacked	1,353
Lost access to a page or group I used to manage	1,188
Content I appear in, that I do not want displayed*	Not Available
Request access to personal data	0
Bullying or Harassment	2,243
Inappropriate or Abusive Content	1,496
Other issue	6,660
Total	**18,463**

We took action on 4,489 reports in total. The remaining 18,463 reports were reviewed, and we provided appropriate tools to users to resolve their issues.

*We are unable to generate the metric for this reporting period due to a technical issue which we are currently investigating.

Orders from the GAC

Table 7: Orders Received from the Grievance Appellate Committee (2025-07-01 **-** 2025-07-31**)**

Orders Received	Orders Complied With
70	70

We have amended the August 2024 and September 2024 report to reflect the accurate number of orders received from the Grievance Appellate Committee.

Note:

Reports in the above categories containing legal processes, including but not limited to court orders, court decisions, statutory declarations, or cease & desist letters, are escalated for legal review
Individuals identifying themselves as law enforcement are requested to submit their requests through the Law Enforcement Online Request System (LEORS), an online portal for law enforcement reporting wherein their identity may be verified.
Reports from a government official or a court officer seeking to submit an order, notice or direction are escalated for legal review.

In Intellectual Property infringement cases, we direct the reporter to the form on 'Reporting a Violation or Infringement of Your Rights'. The data on grievances received from users in India for this category is excluded from this report.

In some cases, our reviewers may determine that an issue was mis-categorized in the original report, and escalate the report to specialized review under the right categories. Where applicable, we will include these in the final numbers for actions taken.

In certain cases, reporters may include multiple URLs in their report. If an action is taken on any one of these URLs in a single report, the report will be listed as actioned.
