Voluntary actions

In addition to reviewing and actioning reported content, content that may violate our guidelines can also be found via voluntary methods. The mechanisms used to detect different potential violations may vary based on the state of available technology, the volume of violative content and other factors such as the complexity of evaluation. We continue to iterate and evolve our tools and expect ongoing advancements as our teams continue to strive to maintain a positive and safe environment. The data in this section covers statistics on voluntary deactivations taken on content that was found via voluntary methods, including those actioned using automated tools, against users' content in India.

1. Anyone who owns a copyright to content can apply for access to the Content Claiming Portal to claim their content and control how it appears on Pinterest. Once a rights holder uploads a particular image, they can tell us whether they want to allow that image to appear on Pinterest. If they choose to block the image, we will remove any matching images that we are able to identify, and continue to do so going forward; we classify those removals here as “voluntary” because the rights holder did not identify or report the removed Pins. The rights holder simply provided an image file; they did not identify or report any Pins as violating their rights. Indeed, rights holders may upload images to the Content Claiming Portal that have no matching Pins on Pinterest.

2. Rights holders can select "remove all" or "remove all but mine" options in the Copyright Infringement Notification form, asking Pinterest to remove all copies of the image identified in their request. Identical copies of the image file on the platform at the time the report is processed are removed by this function and are considered “voluntary.”
